

Robert S. Messina

Senior Vice President, Engineering & Technology, Chief Technology Officer

Robert S. Messina is Oshkosh Corporation's Senior Vice President, Engineering & Technology and Chief Technology Officer, a position he was appointed to in 2015. Mr. Messina has responsibility for all aspects of engineering, global technology and new product development across all of the Company's product lines. Most recently, Mr. Messina served as Vice President, Engineering & Program Management for the Company's Access Equipment segment, and Vice President, Engineering for Oshkosh Defense.

Prior to joining Oshkosh, Mr. Messina spent 15 years at Chrysler Corporation holding roles of increasing responsibility in powertrain engineering and manufacturing.

Mr. Messina received his bachelor's degree in mechanical engineering from Michigan Technological University and a master's degree in mechanical engineering from Oakland University.
